Dear President Shaut,

I am requesting that we update the "Sidewalk Café" portion of our City Code (346-1 to 346-5) to reflect the communities desire to continue to allow for the expansion in Outdoor Dining options that the City first trialed due to the COVID-19 pandemic. The response from the community and businesses alike was overwhelmingly positive during the Outdoor Dining seasons in 2020 and 2021.

I believe the City Code should be updated to better reflect these outdoor dining options with the appropriate rules and regulations. I am requesting that this item be added to the agenda for the appropriate committee meeting in March. Draft language will be submitted prior to the meeting.

Respectfully submitted,

Steven T. Noble
Mayor

Re: Kingston Forward (Citywide Comprehensive Zoning Re-write)

Dear President Shaut,

As you are aware, the City is currently undergoing a citywide rezoning process. The new Form-based Code will seek to encourage future redevelopment in an organized manner and further the goals and vision that continue to be gathered as part of a citywide public outreach process.

Pursuant to 6 NYCRR Part 617, the State Environmental Quality Review Act (SEQRA), the City, through our consultants, will be preparing a Generic Environmental Impact Statement (GEIS) to evaluate potential adverse environmental impacts associated with Adoption of a new Zoning Code (the "Action"). Under SEQRA, the City of Kingston Common Council will be expected to take the following steps:

1. Confirm that the Action is classified as Type I under Section 617.4 (b) (1) of SEQRA;
2. Declare Lead Agency Status as the only Involved Agency;
3. Issue a Positive Declaration of Environmental Significance; and
4. Schedule a Public Scoping Session.

To assist you in the process, I have included the following attachments to this letter:

- A completed DRAFT Full Environmental Assessment Form (FEAF), Parts 1, 2 and 3; and
- A DRAFT Scoping Session Outline.

If you have any questions, please do not hesitate to contact me. I ask that you please forward this communication to the next regularly scheduled Laws and Rules Committee for consideration and discussion.

Respectfully submitted,
Bartek Starodaj
Director of Housing Initiatives

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1 is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project: Kingston Forward - Form-Based Code Rezoning		
Project Location (describe, and attach a general location map): City of Kingston, Ulster County, NY (Whole City) - See 'City of Kingston Base Map'		
Brief Description of Proposed Action (include purpose or need): A new Chapter 405 Form Based Code (FBC) will replace existing Euclidean land use zoning standards in order to guide the physical form of development. The FBC will prescribe details of new building by addressing factors like: relationships of buildings to streets and open space, height and massing of buildings, and architecture and street design details. The following FBC Articles will be used to generate a Regulating Plan and the specific requirements for each new zone: I. Overview & Definitions; II. Regulating Plans; III. Transect Standards; IV. General Standards; V. Street Design Standards; VI. Public Open Space & Trails; VII. Large Site Standards; and VIII. Administration. As for purpose and rationale, existing zoning dates to the 1960s. It has been amended in piecemeal fashion and aspects are unclear. Existing zoning does not align with Kingston's historic context and building character and many existing buildings could not be built today under the existing zoning rules for minimum lot size, building height, permitted mix of uses, etc. Thus, the zoning rules re-write is intended to aid City-scale growth and advance goals for mixed-uses, affordable housing, walkable streets, preservation and enhancement of community character, economic growth, compatible infrastructure and long-term sustainability.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
Project : Kingston Forward - Form-Based Code Review
Date : February 22, 2022

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “Yes” to a numbered question, please complete all the questions that follow in that section.
- If you answer “No” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

The City of Kingston plans to replace its existing zoning with a Form Based Code (FBC). A Form-Based Code focuses primarily on the physical form of development (rather than land use) and can be used to implement a desired community vision. Land uses are still regulated, but more flexibility on use is built into the code, and the rules are based on context – the type of place or environment you are trying to create. Form-Based Codes make development more predictable, promote better design, and are simpler, so it is easier for people to use the code and understand what it allows.

The existing City zoning ordinance dates from the 1960s; it has been amended in a piecemeal fashion over the years and it can be confusing and unclear. The existing zoning does not align with Kingston's historic town-building tradition; for example, many existing buildings would not be allowed to be built today under rules for minimum parking, minimum lot size, building height and permitted mix of uses. The intent of the zoning re-write is to create standards that better fit the City's historic settlement patterns, to encourage historic preservation and building reuse as well as compatible infill and investment, and to include new standards that further community goals identified through a public planning process such as the design of walkable streets, sustainability and affordable housing.

This Part 3 assessment is formulated to help the reviewing agency define whether potential impacts that may arise in conjunction with the Form-Based Code (FBC) policy changes are significant and whether such potential impacts may be mitigated by aspects that will be proposed under this project. Best practices and design standards will be included in the FBC to help avoid or minimize the potential for undesirable impacts to arise in conjunction with new development that occurs under the zoning policy changes.

The following assessment of each major potential impact that could arise is generated by considering the project's setting, the probability of an impact occurring, as well as its duration, irreversibility, geographic scope and magnitude, and the potential for short-term, long-term and cumulative impacts. As noted, there will be design standards and techniques included as part of the FBC to avoid or minimize impacts, but this assessment focuses on explaining how the reviewing agency has determined that the impacts may or may not be large or significant.

The following listing identifies types or categories of potentially significant environmental concern that should be analyzed in a Generic Environmental Impact Statement (GEIS). These factors will be analyzed in terms of environmental consequences that may occur as a result of city-wide rezoning.

• While the FBC will guide development to aid resource conservation and reinforce traditional building patterns and context, it is possible that FBC implementation could result in some larger impacts to geology, soils, and topography (e.g. construction could increase the extent of impervious surfaces or building below grade could interface with ground water levels).

Page 2 of 2: Reasons Supporting this Determination (Kingston Forward – Form-Based Code rezoning)

- The FBC will provide for open space and natural features preservation during property development. Specifically, it aims to facilitate identification of natural elements of sites and areas that are preferably conserved, and it encourages infill development and adaptive reuse on already built and disturbed areas so as to best protect natural areas and resources. However, the proposed zoning action could result in a large number of new land uses and infill development in different parts of the City. This may conceivably alter drainage patterns or enable construction that could potentially impact hydrology and the qualities of wetlands and associated surface waters. It is important to note, existing policies with regards to environmental protection (such as limits for building within wetlands or flood hazard areas and stormwater management policy) will remain in effect and act in conjunction with the FBC.
- FBC implementation will provide for context analysis that will identify potential natural resources and habitats that should be conserved and it will prompt threshold developments to practicably avoid such resources. Yet, land development could create some potential for impacts to particular species, whereby new building that could not happen under existing zoning may impact ecology, such as by generating stress upon possible habitats. Therefore, the environmental review documentation will identify how site-specific development may be structured to apply best practices and minimize potential for undesirable severe impacts to habitats to arise during construction and based on designs.
- The proposed action may affect water bodies within a designated coastal zone. The impact of new regulations and permitted uses on natural and open space resources will be examined.
- The FBC seeks to counteract the potential for sprawl and inefficient land use which can potentially effect facets of the natural and human environment. The environmental review will evaluate the extent of how potential changes in building arrangements, development, and the structured evolution of streetscapes may influence walkability, resource consumption like overall demand for energy, and the extent there will be compact and transit-oriented growth.
- There is potential that the new FBC building standards will alter patterns and the form of development. Rezoning is intended to be in concert with officially approved or adopted plans, however, there may be elements that are new, updated or inconsistent that will require evaluation.
- The FBC will maintain and support existing historic districts and designations and provide standards that guide growth so that new development is in character with the traditional urban building form, and so that the design and appearance of and changes to structures compliment placemaking and the conservation of historic and cultural resources. FBC design standards and proposed regulating plans will be analyzed for how standards could impact important historic and architectural resources, such as by altering settings or the integrity of resources, in an existing or potential National or State Register Historic District, or involving property that may be listed on, or eligible for listing on, the National or State Register of Historical Places.
- The transportation components of the FBC will provide opportunities for a multimodal approach that provides for walking, biking, driving, and using transit. The rezoning could generate substantial increases in activity in various modes of transport, above present levels, or in a way that generates new demand for transportation facilities, or services, which could alter traffic and the patterns of movement of people and goods within the city.
- The rezoning may generate a potential increase in the demand for City services. Spatial patterns that may affect service demand will be analyzed; however by reducing barriers to development on existing disturbed areas rather than encouraging new greenfield development, it is anticipated the FBC will reduce impact.

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
City of Kingston Common Council as lead agency that:

☐ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☒ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
